

Enjoy professional business email
anywhere, anytime and on any device!

Introducing Opality's hosted solution: Microsoft Exchange with seamless BlackBerry integration

Now you can link PCs, laptops, BlackBerry's and all makes of mobile phone or PDA onto one unified "Virtual Exchange" featuring wireless delivery and synchronisation of email, calendar, contacts, tasks and a host of other useful business applications.

- From R75 monthly per user - free one month trial, no installation charge
- Just "plug in" and switch on - zero staff and server hardware or software required
- Enterprise level reliability, security and redundancy - 99.9% Quality of Service SLA

Unlock the full power of the world's leading enterprise collaboration and communication systems through one integrated hosted solution that communicates to any device using any platform.

- No missed meetings or lost opportunities through sub-par information delivery and scheduling
- Never lose your valuable information and data, even if you lose or break your device!
- BlackBerry, iPhone, PC, Mac, Symbian, Windows, Nokia, Samsung, Sony Ericsson... whatever the device and its OS, they all plug and play with the Opality system.
- No more issues or expenses around purchasing new software or integrating different versions.

Opality Hosted Exchange includes the following features at no extra charge:

- 24/7 Support • 2003/7 MS Outlook Client • 2008 Entourage • Anti-virus scanning
- Pro Advanced Anti-spam • Automatic Secure Daily Backup plus easy restore if/when required
- Unlimited Distribution Groups • Opality Administration and User Control Panels
- MS Outlook Web Access • Free installation
